SOFTWARE REQUIREMENTS SPECIFICATION

ACADEMIC NOTES SHARING APP

1. Introduction

1.1 Purpose

The purpose of this document is to describe the software requirements of the Academic Notes Sharing App. This application helps students upload, share, and access academic notes easily through a centralized digital platform.

1.2 Scope

The Academic Notes Sharing App provides a simple and efficient way for students to share study materials such as notes, PDFs, and documents. It reduces dependency on physical notes and encourages collaborative learning among students.

2. Overall Description

2.1 Product Perspective

The Academic Notes Sharing App is a web/mobile-based application that allows users to upload and download academic notes. It works as an independent system accessible through a browser or mobile device.

2.2 Product Functions

- User registration and login
- Upload academic notes
- View and download notes
- Search notes by subject or semester
- Manage user profiles

2.3 User Classes and Characteristics

- Students – Upload and download notes
- Admin – Manage users and uploaded content

2.4 Operating Environment

- Web browser (Chrome, Firefox, Edge)
- Android mobile devices
- Internet connection required

2.5 Design and Implementation Constraints

- Internet connectivity is mandatory
- Limited storage for uploaded files
- User authentication required

3. System Requirements

3.1 Functional Requirements

FR1: User Registration – The system shall allow new users to register using valid details.

FR2: User Login – The system shall authenticate users using username and password.

FR3: Upload Notes – The system shall allow users to upload academic notes in supported formats (PDF, DOC).

FR4: View Notes – The system shall display uploaded notes categorized by subject and semester.

FR5: Download Notes – The system shall allow users to download selected notes.

FR6: Search Notes – The system shall allow users to search notes using keywords.

3.2 Non-Functional Requirements

- Usability – The application shall be easy to use and user-friendly.
- Performance – The system shall load pages quickly.
- Security – User data shall be protected using authentication.
- Reliability – The system shall function without failure during normal usage.

4. External Interface Requirements

4.1 User Interface

The system shall provide a simple graphical user interface with clear navigation options.

4.2 Hardware Interface

The system shall run on devices with basic hardware configuration.

4.3 Software Interface

- Web browser
- Backend server
- Database system

5. Future Enhancements

- Rating and feedback for notes
- Comment section for discussions
- Cloud storage integration
- Mobile application support

6. Conclusion

The Academic Notes Sharing App aims to simplify the sharing of academic resources among students. This SRS document defines the functional and non-functional requirements needed to develop the system efficiently.
