
Team Details

- ➔ Team name - Social Intelligence Lab
- ➔ Team leader name - DHARSAN D R
- ➔ Problem Statement - Millions of citizens lose access to legal protections and government welfare benefits because complex documentation and fragmented systems prevent them from understanding and claiming their rights.

PROBLEM STATEMENT

Title: The Access-to-Rights Gap in India

Content:

- Complex legal and administrative language limits citizen understanding
- Low awareness of eligibility for central and state welfare scheme
- High legal consultation costs
- Language and literacy barriers
- Fragmented grievance filing systems

Impact:

- Financial loss from unclaimed benefits
- Exploitation through unclear contracts
- Delayed grievance resolution
- Underutilization of public welfare programs

SOLUTION OVERVIEW

Title: NyayaAI – Citizen Rights Intelligence Platform

Content:

NyayaAI is a multilingual AI-powered platform that:

1. Simplifies legal and government documents
2. Matches citizens with eligible schemes
3. Auto-generates structured complaints and applications
4. Provides actionable next-step guidance

Target Users:

- Rural citizens
- Farmers
- Small business owners
- Students

OPPORTUNITY

Title: Market and Ecosystem Opportunity

Government Environment:

- Rapid digitization of public services
- Expansion of central and state welfare schemes

Market Estimate:

If 100 districts adopt NyayaAI at INR 8 lakh annually:

100 × 8,00,000 = INR 8 crore per year

Conservative district-level SaaS penetration assumption.

DIFFERENTIATION

Title: Competitive Positioning

Existing Systems:

- Static government portals
- Legal consultation marketplaces
- Scheme listing websites

NyayaAI Differentiators:

- AI-driven document simplification
- Structured eligibility intelligence engine
- Contract risk clause detection
- Automated formal drafting

UNIQUE VALUE PROPOSITION

Title: Unique Value Proposition

- AI + Retrieval-Augmented Generation knowledge engine
- Structured eligibility filtering logic
- Risk clause identification module
- SaaS-ready B2G deployment design
- Scalable cloud-native architecture

FEATURES

Title: Core Features

- Legal Document Simplifier
- Scheme Eligibility Checker
- Complaint and RTI Generator
- Risk Clause Highlighter
- Deadline Alert System
- Geo-filtered Recommendations
- Administrative Analytics Dashboard

PROCESS FLOW DIAGRAM

SYSTEM ARCHITECTURE DESIGN

Title: Technical Architecture

Frontend Layer
(Web / Mobile Application)
↓
API Gateway (FastAPI Backend)
↓

AI Layer

- LLM Engine
- RAG Knowledge Retrieval

Parallel Logic Layer

- Eligibility Rule Engine

↓

Data Layer

- Vector Database (Scheme Knowledge Base)
- PostgreSQL (User Data, Logs, Analytics)

TECHNOLOGY STACK

Title: Technologies Used

- Python
- FastAPI
- React / Flutter
- Open-source LLM
- LangChain (RAG)
- PostgreSQL
- FAISS Vector Database
- Docker
- Cloud Hosting

USAGE OF AMD SOLUTIONS

Title: Alignment with AMD Infrastructure

NyayaAI can leverage:

- AMD Instinct GPUs for AI model training
- AMD ROCm platform for acceleration
- AMD EPYC processors for backend deployment

Benefits:

- Optimized AI inference
- Cost-efficient performance scaling
- Hardware-accelerated deployment

ESTIMATED IMPLEMENT COST

Title: Prototype Cost (3 Months)

Development:
3 Developers × INR 25,000 × 3 months
= INR 2,25,000

Cloud and Hosting
= INR 30,000

Testing and Miscellaneous
= INR 20,000

Total Estimated Cost
= INR 2,75,000

REVENUE MODEL

Title: Financial Sustainability

Primary Revenue Model:

District SaaS Subscription

Example:

10 districts × INR 8 lakh
= INR 80 lakh annually

Estimated Annual Operating Cost
= INR 25 lakh

Secondary Revenue:

- NGO licensing
- CSR partnerships
- Premium mobile access

RISK , MITIGATION AND ROADMAP

Title: Risk Management Framework

Risk: AI inaccuracies

Mitigation: Source citation and confidence scoring

Risk: Legal liability

Mitigation: Informational positioning and disclaimers

Risk: Data privacy

Mitigation: Encryption, secure storage, consent-based usage

Title: Implementation Roadmap

Phase 1: Prototype Development

Phase 2: Pilot Deployment in One District

Phase 3: NGO and CSC Partnerships

Phase 4: Multi-District SaaS Expansion
